AGRICULTURAL ENGINEERING

The Journal of the

American Society of Agricultural Engineers

Index to Volume 12—January to December 1931

Issues	Pages
January	1- 36
February	37- 70
March	71-104
April	105-142
May	143-178
June	179-252
July	253-290
August	291-330
September	331-366
October	367-396
November	397-428
December	429-460

Adams, R. L.
The management of large farms.... 352

Agricultural Engineering (Agricultural Engineer)
(See also American Society of Agricultural Engineers, Engineering, Meetings)
The new bureau (editorial) 68
Engineering basis for reorganization (editorial) 102
Agricultural engineers look beyond. 181
Agricultural engineering takes its place 184
Agricultural engineering in the federal department of agriculture.... 195
Agriculture's engineering department 196
Tomorrow's jobs for agricultural engineers 200
The engineer's obligation in meeting agricultural competition 247
Professional and educational standards (editorial) 286
The philosophy of agricultural engineering 307
(Correction to the above paper)... 418
Agricultural engineering educational standards 345
Agricultural engineering in France (editorial) 394
The relation of the agricultural engineer to the farm equipment industry 406
(Correction to the above paper)... 460
New triple alliance (editorial) 424
The contribution of agricultural engineering to rural life 447

Agricultural Engineering Digest
Pages 31, 65, 99, 138, 173, 283, 325, 361, 392, 421, 453

American Society of Agricultural Engineers
(See also Agricultural Engineering, Meetings)
A.S.A.E. organization personnel 1930-31 101
Launching a new engineering society 182
The A.S.A.E.: 1906-1931 185
Our presidents 187
Our honorary members 190
Anniversary (editorial) 252
Opportunity (editorial) 252
The president's annual address 255
The anniversary influence (editorial) 286
A.S.A.E. twenty-fifth anniversary celebrated 287
Membership values (editorial) 424

Ashby, Wallace
A method of comparing plow bottom shapes 411

Atherton, G. A.
Reclamation and development in the Sacramento-San Joaquin Delta ... 129

Bainer, Roy
Preliminary trials of a new type of mower 165
Tests on hose for fighting rural fires 171

Baker, E. J., Jr.
A quarter century of tractor development 206

Banning, F. D.
Water control progress in Florida.. 338

Barr, H. T.
Artificial dehydration of forage crops 243

Bates, E. N.
Tests on resistance to the passage of air through rough rice in a deep bin 145
Storing rough rice in bulk in concrete terminal and country elevators 313

Beets
Developing machinery for beet production 49

Bell, E. J., Jr.
Economics of storing grain on the farm 311

Beresford, Hobart
Effect of mechanical equipment on labor in dairy production 163

Black, R. H.
Proper storage facilities for the safe keeping of wheat 310

Blasingame, R. U.
Corn production studies with the general purpose tractor 89

Bodnar, G. P.
Tests on resistance to the passage of air through rough rice in a deep bin 145
Storing rough rice in bulk in concrete terminal and country elevators 313

Boss, Dr. Andrew
The training of research workers.. 409

Boyd, G. R.
Engineering achievements in land clearing 219

Brackett, E. E.
The Nebraska tractor tests 205

Brew, J. D.
Heat sterilization in milk control... 20

Brooders
Advantages and disadvantages of electric brooders 157

Brown, Theo.
Engineering development of tillage equipment 211

Bullock, F. J.
New developments in machinery for processing animal feeds 431

Carter, D. G.
Engineering's contribution to the farm home 225
The need for farm house standards. 445

Carter, W. H.
Comparative effectiveness of hand and mechanical corn picking 276
(Correction to the above paper)... 324

Chemistry
The future of chemistry in agriculture 381

Cheney, C. T.
Grading students in farm mechanics 78

Clearing, Land
Engineering achievements in land clearing 219

Clyde, A. W.
Barn ventilation with electric fans.. 9

Colby, B. C. and Colby, B. R.
Temperatures of peat soil relative to summer frost control 93, 131

Collins, A. A.
General-purpose farm equipment in Iowa 416

Concrete
Tests for impurities in sand for concrete 164

Corn
Results of a corn-harvesting machinery experiment 3
Corn production studies with general-purpose tractor 89
Mechanics of European corn borer control 248
Present status of mechanical corn picking 267
Comparative effectiveness of hand and mechanical corn picking 276
(Correction to the above paper)... 324
The development of a corn combine 277
Status of European corn borer control 442

Cotton
Cotton harvesting development to date 73
Mechanization of cotton production 244
Factors affecting grades of cotton. 438

Cumings, G. A.
Some engineering phases of fertilizer application experiments 351

Dairy Engineering and Equipment
(See also Milk, Refrigeration)
The industrialization of dairy production 15
Heat sterilization in milk control... 20
The present status of machine milking 151
Effect of mechanical equipment on labor in dairy production 163
Engineered dairy production and machinery 241
Present trends in dairy management methods and structures 389
Electric dairy stable ventilation 443

Davidson, J. B.
Launching a new engineering society 182
The philosophy of agricultural engineering 307
(Correction to the above paper)... 418

Dehydration
Tests on resistance to the passage of air through rough rice in a deep bin 145
The dehydration of cow manure .. 149
Artificial dehydration of forage crops 243

Doane, D. H.
Factors affecting grades of cotton.. 438

Dougherty, J. E.
Advantages and disadvantages of electric brooders 157

Agri Engr
S671
A2

Drainage
Influence of irrigation and drainage on farm machinery design and development 117
The Poppelsdorf mole-tile drainage system 419

Economics
(See also Management)
Economics of farm structures 6
The need of reorganization in agriculture 17
World competition in agriculture (editorial) 35
Farm building economics (editorial) 35
Economic problems of western reclamation 123
Economic factors in farm electrification 161
Problems of financing land reclamation 167
Engineering-economic relationships in the agricultural industries 198
The machine age in American Agriculture 201
The economics of farm buildings.... 223
The engineer's obligation in meeting agricultural competition 247
The function of the extension engineer in the reorganization of agriculture 293
Economics of storing grain on the farm 311
Obsolescence of farm equipment (editorial) 365
Cost and value of machines in farm production (editorial) 424

Education
Grading students in farm mechanics 78
Objectives of higher education in agriculture (editorial) 176
Agricultural engineering education.. 193
Does his college course fit the agricultural engineer for the farm machinery field?..... 257
Professional and educational standards (editorial) 286
Engineering educational standards.. 343
Agricultural engineering educational standards 345
The training of research workers... 409

Electrification, Rural
(See also Brooders, Fans, Lighting, Refrigeration)
Suggestions on extension programs in rural electrification 55
Progress in rural electrification (editorial) 102
Economic factors in farm electrification 161
A decade of farm electrification 235
Research in rural electrification 238
Electricity and the agriculture of the next ten years 301
Factors influencing power demands of electric-motor-driven threshers. 357
Characteristics of rural electric lines 413

Ellis, W. D.
Problems of financing land reclamation 167

Engineering
Engineering and the business depression (editorial) 68
Kettering on ideas (editorial) 68
Engineering's service to agriculture 183
Engineering-economic relationships in the agricultural industries 198
Engineering development of tillage equipment 211
Engineering achievements in land clearing 219
Engineering possibilities of the combine idea 229
Engineering requirements of rural fire-fighting equipment 251
Engineers' responsibility to the state 339
Some engineering phases of fertilizer application experiments 351

Erosion, Soil
The need of improved machinery for terrace construction and farming terraced land 39
Types of terracing machinery used in Texas 43
Problems involved in developing terracing machinery 45
Studies of the role of forest vegetation in surficial run-off and soil erosion 107
Vegetative cover, the water cycle and erosion 112
Relation of erosion to soil productivity 114
Soil building with terraces 120
The status of soil erosion control... 218

Extension
Suggestions on extension programs in rural electrification 55
Power and labor demonstrations (editorial) 176
Agricultural engineering extension.. 194
The function of the extension engineer in the reorganization of agriculture 293

Fairbank, J. P.
Engineering requirements of rural fire-fighting equipment 251

Fairbanks, F. L.
Electric dairy stable ventilation ... 443

Fans
Barn ventilation with electric fans.. 9

Farrall, A. W.
Engineered dairy production and machinery 241

Fire Protection and Prevention
Tests on hose for fighting rural fires 171
Engineering requirements of rural fire-fighting equipment 251

Fletcher, L. J.
Mechanical power—the basis of the next agricultural revolution 199
Let us now be up . . . (editorial)... 364
The relation of the agricultural engineer to the farm equipment industry 406
(Correction to the above paper)... 460

Forney, R. L.
Accident hazards in agriculture 53

Frost, K. R.
Tests on hose for fighting rural fires 171
Power requirements of spray agitation 265

Fuels
The farm engine fuel situation 245
Agricultural fuels and lubricants ... 405

Garver, H. L.
The uses of artificial light in agriculture 236

Giese, Henry
The status of farm structures research 224

Grain
(See also Corn and Rice)
The design of grain storage structures 274
Economics of storing grain on the farm 311
Harvesting small grains by binding and heading 375

Gray, R. B.
Mechanics of European corn borer control 248

Greene, H. T.
The industrialization of dairy production 15

Gunlogson, G. B.
Farmer's contributions to farm machinery invention 203

Hamlin, F. H.
New developments in machinery for processing animal feeds 431

Hardy, E. A.
Machinery for weed control 369

Harvesting Machinery
Results of a corn harvesting machinery experiment 3
Observations on trials of a new type of small grain harvester 59
Separating efficiency of prairie type combines on cross grades 63
Cotton harvesting development to date 73
Preliminary trials of a new type of mower 165
Development of the grain combine .. 230
Factors influencing power demands of electric-motor-driven threshers 357
Harvesting small grains by binding and heading 375

Haw, J. W.
Economic problems of western reclamation 123

Heitshu, D. C.
Engineer observes great changes in California delta 350

Hienton, T. E.
Factors influencing power demands of electric-motor-driven threshers 357

Holman, A. T.
Problems involved in developing terracing machinery 45

Houses, Farm
Engineering's contribution to the farm home 225
The South favors five-room house... 384
The need for farm house standards. 445
Size of rooms in five-room houses.. 450

Howell, B. B.
The industrialization of dairy production 15

Huntington, Arthur
Engineering-economic relationships in the agricultural industries 198

Irrigation
Influence of irrigation and drainage on farm machinery design and development 117
Irrigation in western Oregon 279

Israelsen, O. W.
Coordination of research concerning the flow of water in soils 435

Jones, G. D.
General-purpose tractor design 91
(Correction to the above paper)... 139

Kable, G. W.
Research in rural electrification 238

Kaiser, W. G.
Engineered farm structures 220

King, Arthur
Irrigation in western Oregon 279

King, J. A.
The place and function of land reclamation in the agricultural program 333, 385

Kotok, E. I.
Vegetative cover, the water cycle and erosion 112

Kranick, F. N. G.
Development of the grain combine.. 230

Krieger, C. G., Jr.
The farm engine fuel situation 245

Lacy, H. E.
Heating and ventilating sweet potato storage houses 451

Lewis, M. R.
Irrigation in western Oregon 279

Lighting
Ultra-violet light in poultry production 79
The uses of artificial light in agriculture 236

Logan, C. A.
The development of a corn combine 277

Long, J. D.
The design of grain storage structures 274
Storage facilities for safe keeping of rice 314
Present trends in dairy management methods and structures 399

274.82

Lowdermilk, W. C.
Studies of the role of forest vegetation in surficial run-off and soil erosion 107

Lyle, S. P.
Coordinating building plan service.. 378

Lyman, F. A.
The relation of engineering practices to soil fertility 227

Machinery (Mechanical Equipment)
(See also Dairy Engineering and Equipment, Fire Protection and Prevention, Fans, Fuels, Harvesting Machinery, Lubricants, Power, Standardization, Tractors)
The need of improved machinery for terrace construction and farming terraced land 39
Types of terracing machinery used in Texas 43
Problems involved in developing terracing machinery 45
Developing machinery for beet production 49
Influence of irrigation and drainage on farm machinery design and development 117
The machine age in American agriculture 201
Farmer's contributions to farm machinery invention 203
The machine designer's achievements 208
Engineering development of tillage equipment 211
The relation of reclamation to efficient operation of machinery 216
Engineering possibilities of the combine idea 229
Mechanization of cotton production 244
Mechanics of European corn borer control 248
Present status of mechanical corn picking 267
Some observations on hammer type feed grinders 271
Comparative effectiveness of hand and mechanical corn picking 276
(Correction to the above paper)... 324
The development of a corn combine. 277
After the century of the reaper, the century of power 298
Steam cooling of internal-combustion engines 320
Land reclamation as affecting farm machinery application 359
Machinery for weed control 369
A method of comparing plow bottom shapes 411
General-purpose farm equipment in Iowa 416
Cost and value of machines in farm production (editorial) 424
New developments in machinery for processing animal feeds 431

Malila, T. E.
Solving the materials handling problem in an extensive liming program 156

Management
(See also Economics)
The industrialization of dairy production 15
Farm management (editorial) 34
The farm manager and his responsibility to the profession 46
A farmer and laborer's viewpoint (editorial) 68
Engineering basis for reorganization (editorial) 102
The relation of engineering practices to soil fertility 227
An owner's opinion of large-scale farms 348
The management of large farms ... 353
Institutions for agricultural production 376
Too many acres in the same crops (editorial) 394
Present trends in dairy management methods and structures 399
General-purpose farm equipment in Iowa 416

Marston, Anson
Engineers' responsibility to the state 339

Materials Handling
Solving the materials handling problem in an extensive liming program 156

McCormick, Cyrus, Jr.
After the century of the reaper, the century of power 298

McCrory, S. H.
Agricultural engineering in the federal department of agriculture ... 195
The land reclamation work of the Bureau of Agricultural Engineering 305
Farm structures work in the new federal Bureau of Agricultural Engineering 374
The contribution of agricultural engineering to rural life 447

McKibben, E. G.
Separating efficiency of prairie type combines on cross grades 63
The combination cushion spring and clutch release hitch 87
(Correction to the above paper)... 139
Engineering possibilities of the combine idea 229

McLaughlin, W. W.
Land reclamation in the eleven western states 213

McMillen, Wheeler
Tomorrow's jobs for agricultural engineers 200

Meetings (A.S.A.E.)
Statement on reclamation drafted at Frisco meeting 36
Southern Section presents program at Atlanta 69
Conference of the College Division Advisory Committee 141
A.S.A.E. twenty-fifth anniversary celebrated 287
Meetings (editorial) 456
Technical divisions show progress at Chicago meetings 458

Mervine, E. M.
Developing machinery for beet production 49

Mills, James, Jr.
An owner's opinion of large-scale farms 348

Montfort, P. T.
The use of mechanical refrigeration for farm egg storage 439

Moses, Ben D.
Influence of irrigation and drainage on farm machinery design and development 117
Economic factors in farm electrification 161

Mowrey, C. F.
A ten thousand barrel farm apple storage plant 61

Muller, J. F.
The dehydration of cow manure ... 119

Neal, J. H.
Temperatures of peat soil relative to summer frost control 93, 131

Necrology
Hoffman, Milton H. 104
Hoffman, Arthur Henry 290
Johnson, Elmer 366
Louden, William 460

Nichols, M. L.
The dynamic properties of soil..259, 321

Norman, C. A.
Paper pulleys and cast-iron pulleys in belt power transmission 282

Olney, Raymond
The A.S.A.E.: 1906-1931 185

Patty, R. L.
Results of a corn harvesting machinery experiment 3
Does his college course fit the agricultural engineer for the farm machinery field? 257

Power
(See also Tractors)
A review of power take-off standardization work 24
Proposed A.S.A.E. standard power take-off 27
Mechanical power—the basis of the next agricultural revolution 199
The agricultural power take-off 209
Power requirements of spray agitation 265
Paper pulleys and cast-iron pulleys in belt power transmission 282
After the century of the reaper, the century of power 298
Factors influencing power demands of electric-motor-driven threshers. 357

Prickett, L. C.
Ultra-violet light in poultry production 79
The present status of machine milking 151
New developments in dairy refrigeration 317

Ramser, C. E.
The need of improved machinery for terrace construction and farming terraced land 39
The status of soil erosion control... 218

Reclamation, Land
(See also Clearing-Land, Drainage, Erosion, Irrigation, Water)
Temperatures of peat soil relative to summer frost control 93, 131
Economic problems of western reclamation 123
Reclamation and development in the Sacramento-San Joaquin Delta ... 129
Agricultural engineering on Boulder Canyon project (editorial) 140
Food for thought at joint meeting on land reclamation (editorial) .. 140
Problems of financing land reclamation 167
Land reclamation in the Mississippi Basin 212
Land reclamation in the eleven western states 213
The relation of reclamation to efficient operation of machinery 216
The land reclamation work of the Bureau of Agricultural Engineering 305
The place and function of land reclamation in the agricultural program 333, 385
Land reclamation as affecting farm machinery application 359

Reed, C. O.
The machine designer's achievements 208

Refrigeration
A ten thousand barrel farm apple storage plant 61
Requirements of dairy and general farm refrigeration equipment 239
New developments in dairy refrigeration 317
The use of mechanical refrigeration for farm egg storage 439

Reinoehl, Frank
The farm manager and his responsibility to the profession 46

Research
Opportunities for agricultural engineering research in the southeastern states 83
Agricultural engineering research... 192
The status of farm structures research 224
Research in rural electrification 238
The training of research workers .. 409
Coordination of research concerning the flow of water in soils 435

Rice
Tests on resistance to the passage of air through rough rice in a deep bin 145
Storing rough rice in bulk in concrete terminal and country elevators 313
Storage facilities for safe keeping of rice 314

Some problems in the storage of the southern rice crop 315

Riley, H. W.
Agriculture's engineering department 196

Robb, B. E.
Agricultural engineering extension.. 194
The function of the extension engineer in the reorganization of agriculture 293

Roe, H. B.
Temperatures of peat soil relative to summer frost control 33, 131
Land reclamation in the Mississippi Basin 212

Rosam, V.
Harvesting small grains by binding and heading 375

Rose, P. S.
Engineering's service to agriculture 183

Safety
Accident hazards in agriculture 53

Sampson, A. W.
Relation of erosion to soil productivity 114

Schwantes, A. J.
Observations on trials of a new type of small grain harvester 59

Scoates, Daniels
The South favors five-room house... 384
Size of rooms in five-room houses... 450

Seitz, C. E.
Suggestions on extension programs in rural electrification 55

Sjogren, O. W.
Principles of deep tillage 249

Smith, H. P.
Types of terracing machinery used in Texas 43
Cotton harvesting development to date 73
Mechanization of cotton production. 244

Smith, W. D.
Some problems in the storage of the southern rice crop 315

Soils
(See also Erosion, Soil)
The relation of engineering practices to soil fertility 227
Principles of deep tillage 249
The dynamic properties of soil..259, 321
Coordination of research concerning the flow of water in soils 435

Spillman, W. J.
The need of reorganization in agriculture 17

Standardization (Standards)
A review of power take-off standardization work 24
Proposed A.S.A.E. standard power take-off 27
Proposed A.S.A.E. standard disk blades 29
New standards projects (editorial).. 35
Standardization of farm machinery 232
Intra-company standardization of farm equipment 233
The need for farm house standards 445

Stirniman, E. J.
Tests on resistance to the passage of air through rough rice in a deep bin 145

Storage
A ten thousand barrel farm apple storage plant 61
The design of grain storage structures 274
Proper storage facilities for the safe keeping of wheat 310
Economics of storing grain on the farm 311
Storing rough rice in bulk in concrete terminal and country elevators 313
Storage facilities for safe keeping of rice 314
Some problems in the storage of the southern rice crop 315
The use of mechanical refrigeration for farm egg storage 439
Heating and ventilating sweet potato storage houses 451

Stout, Gerald J.
Results of a garden tractor survey.. 169

Stout, O. V. P.
Agricultural engineering takes its place 184

Strahan, J. L.
The economics of farm structures... 6
The housing factor in milk production 222
